EMERGING

CODERS

Northwestern | McCORMICK SCHOOL OF ENGINEERING

Mission

The mission of Emerging Coders is to build a close-knit community on campus for first-generation, low-income students who share a passion for technology.

Engagements

At Emerging Coders, we believe that access to opportunities should not be limited by one's socioeconomic background. Our aim is to bridge the gap and provide resources and support to help our members excel in the tech industry. One of the highlights of our organization is our weekly meetings, where members gather to discuss the latest developments in the tech industry, share their experiences, learn coding skills and other tech-related topics. These meetings serve as a platform for knowledge exchange and personal development.

In addition to our weekly meetings, we also organize social events twice a quarter. These events provide a relaxed atmosphere for our members to network, socialize, and build lasting connections within the tech community.

We pride ourselves on creating an inclusive environment that welcomes freshmen and other students with little to no prior technical experience. To ensure the holistic development of our members, we also conduct resume workshops. These initiatives aim to equip our students with the necessary tools and guidance to excel in their careers.

We kindly request you to consider sponsoring Emerging Coders and join us in our mission to empower first-generation, low-income students pursuing careers in the tech industry.
